

ROHIT EKNATH LANDGE

FULL STACK .NET DEVELOPER | ASP.NET CORE | ANGULAR | AZURE | MICROSERVICES

Pune, Maharashtra, India | +91-9307776344 | rohitlandge593@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 3 years of experience building enterprise web applications using C#, ASP.NET Core Web API, Angular, TypeScript, SQL Server and Azure. Hands-on experience developing REST APIs, microservices with Azure Service Bus, background processing, secure applications, performance improvements, unit testing and CI/CD. Delivered 20+ APIs and 20+ Angular screens, improved targeted data-heavy workflows by ~60–70%, and participated in onsite requirement workshops and global production rollouts.

TECHNICAL SKILLS

Backend	C#, .NET Core, ASP.NET Core Web API, ASP.NET MVC, Entity Framework Core, Dapper, LINQ, ADO.NET, REST APIs
Frontend	Angular, TypeScript, JavaScript, HTML5, CSS3, RxJS, Reactive Forms, Angular Services, HttpClient, Routing, State Management, Directives, Pipes, Reusable Components
Architecture & Engineering	Microservices, OOP, SOLID, Design Patterns, Dependency Injection, Separation of Concerns, Exception Handling, Logging, Performance Optimization, Asynchronous Programming
Cloud & Azure	Microsoft Azure, Azure Service Bus, Azure Key Vault, Azure App Service, Azure Functions, Azure Storage, Microsoft Entra ID, Azure App Registrations, OpenShift
Database & Integration	SQL Server, Snowflake, Stored Procedures, Transactions, Query Optimization, Apache NiFi, Third-Party Integration
Security	JWT Authentication, OAuth2, MSAL, SSO, Role-Based Access Control (RBAC)
Testing & DevOps	Unit Testing, Coverlet, Code Coverage, Git, GitHub Actions, CI/CD
Agile & SDLC	Agile, Scrum, SDLC, UAT, Production Support
Background & Additional	Hangfire, Windows Services, Python, FastAPI, GraphQL, Docker/Kubernetes Exposure

PROFESSIONAL EXPERIENCE

LTIMindtree | Software Engineer – Full Stack Developer | Pune, India | Oct 2023 – Present

Full Stack Development & Architecture

- Developed 20+ REST APIs using C#, ASP.NET Core Web API, Entity Framework Core, Dapper and LINQ for enterprise workflows, business validations and integrations.
- Developed 20+ Angular screens using TypeScript, RxJS, reactive forms, reusable components and services for dynamic business workflows.
- Applied OOP, SOLID, Dependency Injection, Separation of Concerns and design patterns to build maintainable application features.

Microservices, Integration & Background Processing

- Developed an independently deployed microservice on OpenShift to process and persist data received through Azure Service Bus, enabling decoupled communication between applications.
- Configured Azure Service Bus for asynchronous application-to-application communication and reliable message-based processing.
- Developed Hangfire background jobs using .NET for long-running NiFi and third-party simulation workflows without blocking user-facing requests.

Performance, Quality & Security

- Improved targeted API and UI workflows by ~60–70% through server-side pagination, filtering and more efficient data retrieval for large datasets.

- Improved API performance by optimizing data retrieval, limiting unnecessary database queries and applying asynchronous processing for large and long-running operations.
- Developed unit tests for Angular and ASP.NET Core Web API features and used Coverlet/code coverage to validate changes before deployment.
- Implemented JWT authentication, role-based authorization and structured application logging to secure APIs, improve execution visibility and simplify troubleshooting.

Cloud, CI/CD & Stakeholder Delivery

- Configured Azure Key Vault and Azure App Registrations and worked with Microsoft Entra ID for secure application authentication and authorization.
- Developed GitHub Actions CI/CD workflows for the API repository to automate build and deployment activities.
- Developed a Windows Service to migrate and transform business-critical data from a legacy database to the modern application database, handling schema differences and data restructuring; delivered with zero production defects.
- Participated in onsite requirement workshops to translate business needs into technical solutions and support UAT; participated in global production rollouts by providing live technical support, validating readiness and assisting with release and post-release issues.

AWARDS & RECOGNITION

- iWin Shooting Start Award – LTIMindtree: Recognized for automation that reduced manual effort by ~5 story points per sprint.
- Influencing Badge – LTIMindtree: Recognized for problem-solving, collaboration and business-aligned solutions.

EDUCATION

Bachelor of Engineering – Mechanical Engineering | Dr. D. Y. Patil Institute of Technology, Pimpri, Pune | CGPA: 8.57/10
